

# FIREFLYMortar™

## Material Description

FIREFLYMortar is a gypsum based mortar used to reinstate the fire resistance performance of floor and wall constructions where apertures exist and there is a requirement to restore the fire resistance of the substrate.

## Applications

Used to restore fire resistance through walls and floors. Has load bearing capabilities. Prevention of air leakage. Maintains acoustic performance. Assumed working life 25 years. For internal use only. Due to its fine texture and capacity to expand during curing, it provides a smoke and fire seal around cables and multiple small pipes while creating an excellent bond to surrounding masonry in larger openings.

### Certification

Tested in accordance with AS1530.4 2005  
Assessed in accordance with AS4072.1 2005.

### FRL

Up to -/240/240 dependent on tested system. For subject FRL refer to referenced reports or to the FIREFLYPFP App.
